Use this document to:

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years: **£ 2,643**

Over 3 years you could save **£ 1,620**

Estimated energy costs of this home

	Current costs	Potential costs	Potential future savings
Lighting	£ 207 over 3 years	£ 208 over 3 years	
Heating	£ 2,034 over 3 years	£ 1,580 over 3 years	You could save £ 1,230 over 3 years
Hot Water	£ 312 over 3 years	£ 315 over 3 years	
Total	£ 2,553	£ 1,623	

These figures show how much the average household would spend in this property for heating, lighting and hot water and is not based on energy used by individual households. This includes energy use for heating appliances like TVs, computers and sockets, and electricity generated by microgeneration.

Energy Efficiency Rating

The graph shows the current energy efficiency of your home. The higher the rating the lower your fuel bills are likely to be. The potential rating shows the effect of undertaking the recommendations on page 3. The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60). The EPC rating shown here is based on standard assumptions about occupancy and energy use and may not reflect how energy is consumed by individual occupants.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1. Internal or external wall insulation	£4,000 - £14,000	£ 73
2. Low energy lighting for all fixed outlets	£30	£ 66
3. Replace single glazed windows with low-E double glazed windows	£3,300 - £5,500	£ 171

For more information on the measures shown on this graph please visit the Energy Saving Trust website: www.energy-saving-trust.com or call 0800 123 1234 (standard national rate). The Green Deal may enable you to make your home warmer and cheaper to run.
