Use this document to:
 • Compare current ratings of properties to see which properties are more energy efficient
 • Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:

Current costs	£ 1,563	Potential costs	£ 630
Over 3 years you could save		£ 933	

Estimated energy costs of this home

Category	Current costs	Potential costs	Potential future savings
Lighting	£ 159 over 3 years	£ 96 over 3 years	£ 63
Heating	£ 954 over 3 years	£ 482 over 3 years	£ 472
Hot Water	£ 350 over 3 years	£ 291 over 3 years	£ 59
Total	£ 1,563	£ 673	£ 890

These figures show how much the average household would spend in this property for heating, lighting and hot water and it is not based on energy used by individual households. This includes energy use for heating appliances like TVs, computers and sockets, and electricity generated by microgeneration.

Energy Efficiency Rating

The graph shows the current energy efficiency of your home. The higher the rating the lower your fuel bills are likely to be. The potential rating shows the effect of undertaking the recommendations on page 3. The average energy efficiency rating for a dwelling in England and Wales is band D (rating 65). The EPC rating of your home is based on apparent assumptions about occupancy and energy use and may not reflect how energy is consumed by individual occupants.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1. Increase loft insulation to 270 mm	£100 - £300	£ 33
2. Cavity wall insulation	£500 - £1,500	£ 153
3. Add additional air restrictor to hot water cylinder	£15 - £30	£ 27

See page 3 for a full list of recommendations for this property.
